# Connecting Your Computer to Your Home Network

Log into the computer. Connect the computer to your wifi by clicking on the wifi icon 🛜 the top right screen. Look for your network name and click on it. A box will pop up for you to enter the password to your wifi.
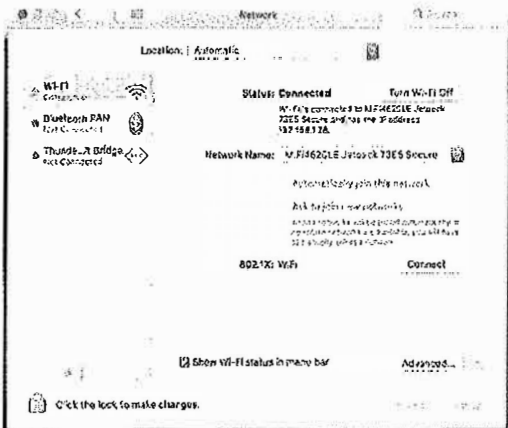

After connecting to your home network, open up Safari. You will see a pop-up window saying "Proxy Authentication Required". Click on System Preferences.

Proxy Authentication Required

Enter the password for the HTTP proxy
ttc.leb.k12.in.us:62235 in System
Preferences.

System Preferences

Not Now
